MANOJ P BHAT

Aspiring Software Engineer | Java • Spring Boot • Data Structures & Algorithms

Bengaluru, Karnataka, India | +91 6363679403 | manojbhat489@gmail.com

LinkedIn | **GitHub** | **LeetCode** | **TakeUForward** | **HackerRank**

PROFESSIONAL SUMMARY

MCA student (CGPA 8.65) with strong foundations in Data Structures & Algorithms, Object-Oriented Programming and Java (including multithreading). Building a full-stack applications with Java, Spring Boot, MySQL, and React plus a machine learning model for transformer failure prediction. Practise problem solving daily on LeetCode, HackerRank and TakeUForward use Generative AI and prompt engineering for code generation and debugging.

EDUCATION

Master of Computer Applications (MCA) – SJB Institute of Technology (VTU), Bengaluru | CGPA: 8.65 **2025 – Present (3rd Sem)**

Bachelor of Computer Applications (BCA) – Srinivas University **Graduated: 2025**

Software Development & Web Design | CGPA:8.12

TECHNICAL SKILLS

Languages: Java (Core, Multithreading), Python, SQL, HTML5, CSS3

Backend & Frameworks: Spring Core, Spring Boot, JDBC, Maven

Frontend: HTML5, CSS3, React, JavaScript,

Databases & Tools: MySQL, Git, GitHub, IntelliJ IDEA, Visual Studio Code

AI & Machine Learning: AdaBoost, Prompt Engineering, Generative AI Agents

Core Competencies: Data Structures & Algorithms, OOP, Multithreading, Problem Solving, Networking, Debugging

PROJECTS

IntelliFlow – AI Code Review & Learning Platform(Building Phase) **Full-Stack Project**

Java 17,React, Spring Core,Spring Boot, MySQL

- Building a full-stack web application that reviews Java, Python and C++ code and returns estimated time and space complexity, detected DSA patterns (binary search, two pointers, sliding window, hashing, recursion), issues, suggestions and a score.
- Designed a modular Spring Boot back end using Strategy and Template Method patterns (one common *Language Analyzer* interface, three analyzers) a new language needs only one new class.

Library Management System **Full-Stack Project**

Java, JDBC, MySQL

- Developed a full-stack library management application to handle book records, issue/return processing, transaction history and user data.
- Designed a relational database schema (MySQL) that replaced manual, paper-based tracking with a centralized digital system.

Transformer Failure Prediction using Machine Learning **Academic Project**

Python, AdaBoost

- Developed a machine learning model using a dynamic feature-weighted AdaBoost algorithm to forecast localized distribution transformer failures.

CERTIFICATIONS

- **HackerRank** – Problem Solving Certification
- **HackerRank** – Java (Basic) Certification
- **Coding Ninjas (Code360)** – Basics of Java, Part I (Jan 2026) and Part II (Aug 2026)

ACHIEVEMENTS & LEADERSHIP

- **Algorithmic Practice:** Consistently solve DSA problems using Striver's A2Z DSA Sheet (TakeUForward) and LeetCode; completed the HackerRank Java Introduction track; active GitHub profile.
- **Leadership:** School Captain (2019–2020); led student initiatives and represented the student body.
